native

ABOUT

Seasoned Software Engineer with more than a decade of professional experience. My core values: promote alignment between technology and product; champion simple and efficient solutions; continuous learning and improvement

MOST RECENT WORK

Complete work history available on my [Linkedin profile](#)

Senior Software Engineer - OLX

Barcelona, Spain (2024 - current)

I have been working in the the GenAI Platform team within the Data Engineering function, and creating AI-based tooling to empower all OLX Engineers

Staff Software Engineer - N26

Barcelona, Spain (2019 - 2024)

I led and owned significant parts of the technical vision in the Platform Engineering team, and impacted almost all N26 Engineering programs. Notable contributions : revamped entirely the CI/CD strategy and tooling for Mobile platforms; shaped the new CI/CD platform for JVM-based backend services; revamped the Observability strategy for Mobile and Web client platforms; streamlined the collaboration between Security and Mobile; shaped and delivered the initiative to significantly improve the supply-chain risk exposure for every JVM-based micro-service in the company; and much more

Lead Software Engineer - Stone Pagamentos

São Paulo, Brazil (2018 - 2019)

I built and led a Mobile Engineering team to create, from scratch, a fully-featured Bank account product targeting SMBs. The product was a huge success and got adopted by thousands of customers in the first year after launched
